DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/1/06 has been entered.

REJECTIONS WITHDRAWN

2. There are no rejections withdrawn.

REJECTIONS REPEATED

3. All of the 102, 103 and double patenting rejections set forth in the non-final rejection of 12/28/05, pages 4-9 are repeated for the reasons of record except for claims 58-59 which now depend from allowable claim 57. Applicant has added the limitation "low gel sheet" which is disclosed by Bonk since the films of Bonk are not gels.

NEW REJECTIONS

4. There are no new rejections.

Allowable Subject Matter

Art Unit: 1772

5. Claims 57-59 and **74-77** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art fails to teach or suggest applicant's polyurethane, ethyl vinyl alcohol copolymer, gel reducing additives as outer layers and alternating layers of polyurethane and ethyl vinyl alcohol copolymer as inner layers. The prior art does not disclose applicant's recited ranges for the gel reducing additive.

ANSWERS TO APPLICANT'S ARGUMENTS

6. Applicant's arguments filed 8/1/06 have been carefully considered but are deemed unpersuasive.

Applicant has argued that Bonk would contain even less than trace amounts of unreacted starting material. While this statement may or may not be true even one molecule of residual ethylene glycol reads on applicant's claims because applicant's claims recite nothing about the concentration of ethylene glycol and so even smaller than trace amounts read on applicant's claims as written.

Applicant has argued that miniscule, undetectable amounts do not amount to anticipation. However, the residual ethylene glycol is not undetectable using modern analytical chemistry techniques.
